Subject: Info for NMFS EIS from EPA

All,

Attached are the documents from Hanh. I think our call at EPA went really well today. After the call, Jolie and I were talking and started thinking that we likely will want to move in the direction of placing the discharge alternative into the considered but not carried forward section and then include measures in the additional mitigation measures section under each alternative related to various types of discharge. I think we will try to think about how to do this in Chapter 2 and make some edits and comments before we send it back to you early next week.

Thanks,
Candace

Hi Candace,

I would like to thank you for the call earlier. I think it would be really beneficial for both agencies to coordinate closely as we move forward in our respective actions. As promised, attached are the following documents:

1. My comments on the alternative write-up you sent a few days ago (See attached file: Arctic EIS Alternatives Descriptions to EPA_HS cmts.docx)
2. Summary table of Notices of Intent (NOIs) from Shell requesting authorization to discharge under the existing Arctic NPDES General Permit

(See attached file: Shell NOI Summary_Send to NMFS 3.24.11.xlsx)

3. ODCE criteria and definition of "unreasonable degradation"
(See attached file: ODCE criteria.docx)

4. ODCE for existing Arctic NPDES General Permit
(See attached file: Final ODCE for Arctic NPDES General Permit.pdf)

5. Existing Arctic NPDES General Permit (will expire June 26, 2011; EPA reissuing as two general permits, one for the Beaufort Sea and one for the Chukchi Sea)
(See attached file: AKG280000 Final Permit.pdf)

Please do not hesitate to contact me if you have any questions.
